

In the Specification:

Amend the first full paragraph on page 5 as follows:

--A female output electrical jack 2 or socket is located on the exterior of the vehicle 13 and is connected to the recording unit 3 via wiring 1. The jack 2 may be used by authorized personnel. The last fifteen minutes of recording may be retrieved. This output jack 2 may be placed anywhere two inches over the driver's side door and between the front window and the rear end of the driver's door. The female output jack 2 is activated only when the vehicle is in operation, that is, it is dependent upon the electrical source of the vehicle 13.--
